AGRI TECHNO
MANUAL RICE TRANSPLANTER-2ROW

Description:-

“Agri Techno” Manual Rice Transplanter (2row) is manufactured and marketed by our Trading & Mfg. company “Sonu Agro Engineering”. Agri Techno Manual rice/paddy transplanter is a high productivity & reasonable structure machine. Easy to operate & no need any professional knowledge to operate this machine. Most valuable thing is that it’s designed for hand transplant rice seedling. So You don’t need to use any plastic bed, fiver tray for rice seedling process. The rice crop procedure is as usual (normal) same before. It can plant the normal crops.

The bottom support is made from wood shown as the picture, not plastic.

The advantages of wood:-

Easy too maintain

Light, easy to operate

The wood has strong water resistance

Technical Specification:-

Brand	Agri Techno
Type of Product	Manual Rice Transplanter
No of rows	2 row
Planting distance	Adjustable
Turning radius	210 mm
Max planting depth	65 mm
Plant hight (min)	150-400 mm
Working efficiency	0.8-1 Acre/hour
Weight (kg)	20 (approx)
Max planting frequency	12nos/min
Row distance	200 mm

★ Features:

It is walking backward operating types. So it will never sink, never destroy your rice/paddy field. The weight of the Chhibber Shakti Manual Rice Transplanter is only 20 kg. So it can move to anywhere by a single person. Most other transplanters are too heavy, when they are transplanting in rice/paddy field, they will not move forward but sink But in case of Chhibber Shakti manual rice transplanter, works perfectly without any trouble because of it’s light weight. So Overall its ideal for small farmers, small fields and hilly areas.

Functions:

- ★ It is walking backward manual transplanter.
- ★ It is a hand cranked roller operate.
- ★ No need of energy, fuel & man power.
- ★ Easy to operate & maintain.
- ★ 5 to 10 times fast than hand transplanting.
- ★ No longer for farmers to bent down when planting.
- ★ It can work well both in the shallow water
- ★ and deep water.
