#### General

NK Instrumentshas indicating type, magnetically actuated flov switches are designed for positive detection of fluid flow throu your equipment. These are suitable for water, kerose lubricating oil of flow viscosity etc. These are available in sizes; i.e. ½", 3/8", ½", ¾", & 1" BSP. Suitable size may be selectedfrom actual flow rate. Flow range covered is from 1 100 LPM. Fluid flow in the System is seen through transpar tube.

### **Technical Specifications**

Max. System Pressure : 10 Kg/cm2 (150 psi)

Temperature Range : 8°C to 10° C

Electrical : Hermetically sealed reed switch.

Contact Rating : 1Amp. 230 VAC SPST or SPDT

(Please take care of surge currents to avoid damage of Reed switch element. In such case please apply R.C. Netwert (#Pleasitoto).

DO not use excessive forces while fixing nozzles/couplings. Use threads sealing for leak-tight joints. Do not hold switch in vice or wrench. Do not exceed electrical rating of the read switch. Use auxiliary relay or contractor for higher current rating and extra number of contacts. Do not exceed normal pressure rating of the switch for standard models. Consult manufacturer for higher system pressure.
