About us

Habricus Group was founded in 2005 as group of companies, to design, manufacture and supply top quality Pre-Engineered Steel Building for use as factory buildings, warehouses, workshops, distribution centers, showrooms, aircraft hangars, schools sports halls, supermarkets, office buildings, car parking sheds and virtually any one, two or three storey building. We are also manufacturing Industrial Machines and Import furniture. We also export all our products worldwide.

We manufacture Pre Engineered Buildings & Industrial machines Like Lathe Machines, All Geared Lathe Machines, Heavy Duty Lathe Machines , Vertical Turning Lathe (VTL), Heavy Duty Rail Planer, Heavy Duty Plano Miller, Press Brake Machine, Hydraulic Shearing Machines, Mechanical Over Crank Shearing Machine, Cylindrical Grinder, Center less Grinder, Surface Grinder, Power Press (C-Type / H-Type), Hydraulic Press, Heavy Duty Saw Machine, Slotting Machine, Pillar Type Drill Machine, Hydraulic Drill Machine, Horizontal Hydraulic Operated Milling Machine, Vertical Hydraulic Operated Milling Machine and All Geared Vertical Universal Milling Machine.

We also manufacture CNC Machines Like CNC Double Column VMC (Vertical Machining Center), CNC Vertical Machining Center (VMC), CNC Vertical Turning Lathe (VTL), CNC Turning Center, CNC Gang Tool Turning Center and CNC Drill Machine.

Since 2005, **Habricus Group** is Located at #17 New Aman Park, Threeke Road, Ludhiana(Pb) an one of the most important industrial city in India, easily accessible by road and train. We are in possession of a group of highly competent technical person, a market-oriented experienced sales team. In the gesture of sincere cooperation, we strive to establish a promise-keeping and quality guaranteeing sales and after service system in order to offer client perfect pre-sales consultation and after - sales service promptly.

Also we have all requisite infrastructures for taking up the fabrication of pre-engineered building systems and manufacturing of our products. Presently, we have more than 250 skilled/semi skilled workers & professionals at the same time.

Habricus Group plays a deliberate and active role in converting complex and expensive conventional steel building designs into simpler and more economically designed Pre-Engineered Buildings without sacrificing the utility and function of these buildings. Today, **Habricus Group** represent the international standard for Pre-Engineered Buildings . The entire engineering process is computerized and done by highly qualified persons.

We have complete quality guarantee system, prompt goods supply as well as perfect after-sales service. We ensure **Habricus Group** to be your first consideration when purchasing Pre Engineered Buildings, high-precision machines and machine tools.

Designs, drawings and calculations made by our engineers and architects are comprehensive yet easy to understand.

We provide the best quality in industry and the best price at same time. Our production capacity and our quality stand us in the top of industry. The standard mode of payment is 70% advance payment and balance before delivery.

We deliver and install our project in given time period. Punctuality is our key to success. Our fast delivery and experienced staff ensures you total time saving of 30-50% in total project. Which also good for our clients and their money .

Our raw material is made High strength steel and by the well known companies and ensures you best quality and performance as comparative to other manufactures. Our inspection team also ensures the quality of products before dispatch so that our clients get the best quality of product. Our Engineering team also keeps their eye on the latest technology to provide best quality and latest technology for our clients.

“Our Quality product and services ensures you the longer life of our Products.”

Customer's satisfaction is our motivation for progress and self-improvement. We sincerely to be your best cooperation partner. Our company have CE, ISO:9001, ISO:9002 international certification.

Broach Sharpening Machine

Specifications

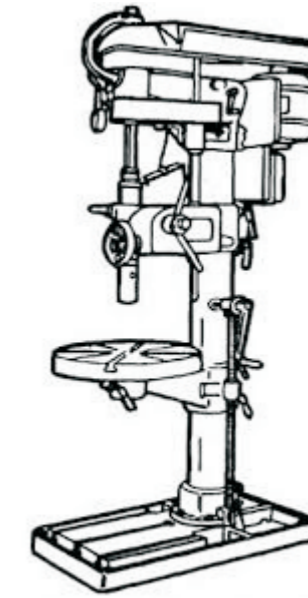

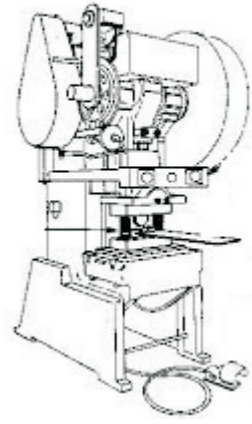

Model		HBS-650	HBS-1300
Length of table	mm	1000	1500
Max. Sharpening Length	mm	650	1300
Height of Center	mm	125	125
Max. Length Flat Broach	mm	200	200
Table Surface Dimensions	mm	1000 x 200	1500 x 220
No. T-Slots	Nos	3	3
T Slots Size	mm	12	12
Grinding spindle Motor	HP	1	1
Grinding spindle Motor	RPM	2800	2800
Min Dia of Grinding wheel	mm	90	90
Max Dia of Grinding wheel	mm	200	200
Spindle RPM	RPM	4000	4000

We also customize machines as per your requirement
