

DH-2

Double Head Diamond Chain Cutting Machine

Conventional Faceting Machine

Specification

- Double head diamond cutting machine for faceting square and rectangular chains.
- The machine is equipped with AC motors and AC drives to ensure long life maintenance free working.
- The machine is equipped with high speed spindle capable of generating 23,000 rpm.
- All the machine components are machined on precision CNC machines and are hardened and grounded. These components are individually inspected for accuracies. The machine is assembled in a controlled environment.
- Horizontal head fitment is also possible on this machine for applying convex or concave faceting on rectangular or square chains.

Technical Data

Dimensions	36 Inches x 29 Inches x 68 Inches (l x b x h)
Weight	750 Kgs.
Input Power	415 Voltages 3 PH 2 KW

Note : All rights of modifications reserved.
