WEAR PLATE

RADIO REMOTE CONTROL GRABS

- *Servoday Grab operates with a Central cylinder and with own gravity circulation of oil.*
- *Very popular among new generation bulkers, preferred instead of Electro Hydraulic Grabs in order to avoid the Cable Drum System and Grab Stabilizer on the Crane Jib, without any additional Electric supply and consumption of fuel by Generators.*
- *Grab operates with a Battery and a Remote Control unit, without any Motor, Pump, Electric supply, Cable Drum, Stabilizer etc.*
- *Grabs can be attached on to the hook of any kind of Crane and the handling of the load can be started.*
- *Grab can be controlled through Remote Control unit up a distance of 100 Meters.*
- *It can be used for handling of every type of Bulk Cargo and it is the most efficient and economical Grab type.*

CAPACITY FROM 2 TO 50 M3
