# MECHANICAL CLAMSHELL GRAB

## FOUR & TWO ROPE TYPES

Proven technology, optimized to your application

With more than 50 years' experience, Servoday is your trusted partner for efficient and highly productive two & four rope mechanical grabs. Whether it is the handling of coal and iron ore or the loading and unloading of grain, animal feed, scrap metal, minerals or biomass; Servoday has an efficient and reliable solution.

### Features:

By using the latest innovations in engineering we have updated our manufacturing process and enhanced our mechanical grab with modular parts. The result is a competitive price, while still using the highest quality materials available. The optimized manufacturing process also guarantees a shorter lead time for the mechanical grab.

To keep the Capital expenditures, CapEx, of the mechanical grab as low as possible we've also decreased logistics costs with our reinvented mechanical grab by designing it with container shipping in mind, to reduce the costs of transportation significantly.

### Capacity:

Bulk holding capacity from 1.0 to 50.0 Cubic Meters
