# Z8-A Z8-B

### Before use:

1) Please prepare a Nano SIM card which supports 2G GSM and GPRS function. Do not support 3G and 4G currently. Choose the card like below:

2) Please scan the QR code and download the APP. Open the APP and registered for an account.

### **Getting Started:**

1) Take the silicone shell off. Insert card into the slot in correct direction. See the sign on the product.

2) Turn on/off: long press the power button for 3 seconds. The red led indicator will blink into green and yellow. The green lights blink quicker, and disappeared , means signal receiving.

3) After blinks 7-10 seconds, open the APP and click the" + "button. Then scan the **IMEI number**(on package box) to add the device name.

4) Home:

GPS online for outdoor use(GPS is more precision positioning):

#### 5) Setting

**Family number:** put the guardian's cell phone number to keep in touch.it can set 7 family numbers totally .

Invite attention and apply for attention : this means we can use more device to binding the locator . (the other device should enter guardian's cellphone no., and login in E-tracing APP .)

### FAQ:

- Will it be used for worldwide? Yes, Make sure the SIM card is supporting at least 2G GSM network and with GPRS function.
- How to power off?
  If already insert the sim card, please take it out firstly. Wait 10 seconds and long press the power button for seconds. The light will turn off.
- 3. Is it waterproof?

The silicone material shell is waterproof. But the bare machine is not waterproof.

4. Why the sim card worked before but then stopped? Please check whether the GSM GPRS function is still available.
