PLEATED CARTRIDGE DESIGN

4S

Solid Solutions to Separate Solids

Utility

Cartridge is pleated constructed for long service life and high-low rates and low pressure drop.

Applications

Coolants, Water, Pre-Filter for Membranes, Most Acids & Alkalies, Pharmaceuticals, Plating Solution, Foods & Beverages, Solvents.

Description

Britomatics Pleated Filter Cartridges provide efficient removal of solid contaminants. The cartridges are manufactured from special grade phenolic impregnated cellulose and polypropylene blown media. The construction ensures superior grade removal efficiency. The cartridges are widely used by our well known customers for variety of applications in petroleum, refinery, oil field, petrochemicals, fertilizers etc.

The cartridges are available in 1u, 2u, 3u, 5u, 10u, 20u, and 100u pore sizes with >99% efficiency level.

Features & Benefits

- Rugged construction.
- Materials compatibility for most applications.
- High surface area.
- High filtration efficiency.
- High dirt holding capacity.
- Pleated media allows high flow rate at a Low pressure drop.
