

Blood Donor Chair

SaiLab Equipment's **Blood Donor Chair** has been developed with the comfort of the donor and working staff in mind. The **blood donor chair** is designed with comfortably wide arm-rests that make it possible for either arm to be utilized for blood collection. If required the donor chair is provisioned to quickly move the head to a position that's lower than elevated feet level. The armrests can be adjusted for height. The chair is sturdy and can be easily used to work at waist level. Easy mobility is coupled with comfort as the chair is made using soft padding and vinyl covering.

KEY FEATURES

- Body steel frame construction
- Power slide control provides smooth shifting from head-low, feet high position to any intermediate position
- Accommodates accessories via support brackets on both sides • Armbar assembly for operator ease and solid arm support
- 25" seat allows waist high working level • Adjustable arm rests move "UP" and "DOWN"
- Premium listed polyurethane foam • High quality, Vinyl Covering
