

Platelet Agitator

SaiLab Equipment's **Platelet Agitator** provides a conducive environment for the storage of platelets. The continuous agitation with controlled temperature provides safe storage. The instrument's easy pull-out and adjustable shelves ensure inventory management. To allow uniform air circulation, the platelet agitator has been fitted with Wire Mesh Steel shelves. Due to the ease of sliding, the cleaning is made very easy. Uniform agitation prevents the clumping of the platelet. With the presence of a sturdy motor, the agitation can run without jerks round the clock. For better viability of platelets, the optimum amplitude is present with the adjustment of Factory speed agitation.

KEY FEATURES

- Easy Pull out, adjustable shelves ensure inventory management
- Wire Mesh Steel shelves for uniform air circulation
- Robust motorized slide for effective 24x7 continuous jerk free agitation
- Factory adjustable speed agitation with optimum amplitude for better viability of platelets

TECHNICAL SPECIFICATION

Agitator Control		Micro Processor
Strokes	Per Mint	70 to 80
Amplitude	Mm	38±2
Dimension	MM	440 x 410 x 395
Trays	Number	5(24) 7(36) 8(48)
Capacity	Platelet Bags	24/36/48
Model No	SPA -24; SPA – 36; SPA - 48
