

Laboratory / Reagent Refrigerator

SaiLab Equipment's **Reagent / Lab Refrigerator** can maintain a steady temperature between 2°C to 8°C. This **laboratory refrigerator** can be optionally fitted with a toughened glass door. By default, it comes with an M.S. Coated door. An LED display for the built-in microprocessor controller-based temperature indicator makes monitoring temperature simple. The reagent comes with 7 Days Circular Chart Recorder. An audiovisual alarm alert of any major temperature deviation or any damage to the stored items. Castor wheels are provided for the easy movement of the equipment. Optimized air channels with large airflow allow for delivery of superior temperature uniformity.
