PAP-TECH PEEL BOND STRENGTH TESTER

MODEL : PAP- 4056

Digital peel tester is used for measuring the peeling strength of seals and lamination on in materials like laminates and laminated sheets. The machine will consist of a digital indicator with auto peak hold button on the indicator to measure the peel/ bond strength in grams, with a least count of 5 grams and a maximum reading of up to 10 kgs.

Salient Features:

Fixed Speed model.

Scaled down version of Generic Tensile Tester.

TECHNICAL SPECIFICATIONS

Load cell range :	0 - 500 gm.
Capacity :	10 Kg.
Least Count :	1 gm.
Test Speed :	100 mm/min.
	254 mm/min.
	300 mm/min.

APPLICATION STANDARDS

ASTM, ISO, IS, BIS, DIN

OPTION

As per customer requirement
