Application:

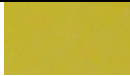

SOLVENT SOLUBLE DYES are suitable for use in transparent lacquers, flexographic and gravure printing inks, glass coating, metalized polyester film coating, stone coating, leather coating, wood stains; for coloring anodized aluminum and plastics such as cellulose nitrate, cellulose acetate and polyester resins.

The coloration of nitrocellulose lacquers for producing transparent shades on metalized polyester film & metal foil constitutes an important field of application for Metal Complex dyes. These dyes are by nature suitable for a variety of applications in many others binder systems such as vinyl resins, alkyd melamine baking enamels, shellac resins and acrylic resins.
