

ENERSOL BIOPOWER PVT. LTD.

Enersol Biopower® a company established in 2013 has attained an enviable reputation in the market for manufacturing, supplying and distributing a range of biomass to energy products.

The consistent increase in LPG prices has significantly impacted the confectionery industry in recent years. Biomass stoves emerge as a favorable alternative to LPG stoves due to their dual advantages of being both environmentally friendly and cost-effective.

Our Bio-Akash21 Biomass Stove is specifically tailored for the confectionery industry, providing heat levels comparable to LPG stoves while also achieving over 60% savings in production costs.

KEY FEATURES OF ESB-R BIO-AKASH21

ESB-R Bio-Akash21 biomass stove has some unique features that make it more advantageous than other available biomass stoves in the market. They are as follows:

- ✓ It is more efficient than traditional chulha.
- ✓ It is a reliable, rugged, and compact system.
- ✓ It has low maintenance requirements and is easy to operate.
- ✓ Accessible to both urban and rural populations.
- ✓ It reduces the use of fossil fuels.
- ✓ It promotes sustainable fuel usage by efficiently utilizing biomass materials such as agricultural residues, wood pellets, or crop wastes, thereby reducing the demand for traditional fuel sources and mitigating deforestation pressures.
- ✓ As it comes with enclosed combustion chambers or temperature control mechanisms, it reduces the risk of accidental fires or burns.
- ✓ An eco-friendly product with low emission & no soot.
