NSL - AQ Series Noiseless Pumps

NSL AQ Series noiseless pumps have been designed to provide efficient, trouble-free operation without generating any kind of noise. These pumps are compact, motor driven and operate on a direct 230 V AC supply. With only 50% of moving components compared to the conventional electromagnetic pumps these pumps offer an extended life with excellent performance in the field. In line with the Quality Policy of Aquanomics, all the components have been precisely engineered to offer another state-of-the-art product by the think tank of Aquanomics engineers.
