Pulse Width Trigger Point	Equal : The oscilloscope triggers when the trailing edge of the pulse crosses the trigger level. Not Equal : If the pulse is narrower than the specified width, the trigger point is the trailing edge. Otherwise, the oscilloscope triggers when a pulse continues longer than the time specified as the Pulse Width. Less than : The trigger point is the trailing edge. Greater than (also called overtime trigger) : The oscilloscope triggers when a pulse continues longer than the time specified as the Pulse Width.
