This is a fully automatic paper plate machine which involves no labour. We have to put five rolls on the machine, and then Machine takes the paper itself and gives the finished product automatically. In one stroke machine gives five plate. You can change the mould according to your requirement. We can use any type of paper (laminated or non laminated), it should be in a roll form. Machine is operated with digital panel board, so we can set the time for formation of plate and the speed of machine as required.

Note: - 1st machine in world to make wrinkle(kangura)plates in fully automatic system.
