

## THERMASTER OTP OVER TEMPERATURE CONTROLLER

- Integral to Polaris Popular heater
- Prevents heater overheating
- Tamperproof resettable controller
- Non corrodable PT100 sensor
- Can be retrofitted on site
- Prevent catastrophic plant failures

**IP65 Controller for high temperature heater cut out C/W reset switch.**

### Description

High temperature safety controller designed to switch power supply off to heater in the event of low liquid level.

**Note:** This controller is designed to prevent catastrophic damage to plant and equipment.

In certain circumstances, the heater may be damaged and should be returned to Braude for examination.

The probe may be retrofitted to an existing Polaris Popular heater.

### ***POLARIS HEATERS ARE INTRINSICALLY SAFE***
