

Ha Serv OÜ is a timber industry based on Estonian capital. The company was established in 1996. In the initial years the main activities of the company were producing and marketing high-quality planed material from knot-free alder and aspen, which is used in the interior finishing of saunas. In years we have expanded our selection of products significantly. Our products can be broadly divided into three: planed material, finished saunas and thermo treated wood.

Under the trademarks Ha Serv and Saunax we produce and market sauna materials from hardwood and softwood: infrared and traditional saunas, thermo-treated wall panelling and terrace decking boards. Ha Serv OÜ has extensive experiences in the production of custom made saunas. We also produce sauna components such as doors, platform modules, benches and glued wood products.

Ha Serv OÜ is mainly focused on the export market, but we also sell our products via resellers in Estonia. Our contractual customers abroad are professional resellers and store chains. Ha Serv OÜ has experiences in exporting it's products to more than 25 countries. Most of them are located in Europe, but one part of our sales market has expanded also to Near East.

Ha Serv OÜ uses modern production technology from the world's leading producers Weining, two automated production lines Fisher/Paul and System TM, high-technology thermal treatment devices WTT and CNC wood processing devices. In early 2012 Det Norske Veritas (DNV) issued the company ISO 9001: 2008 quality management certification. We also possess the international FSC® and PEFC Chain of Custody certifications.

Ha Serv OÜ is a timber industry who is interested in long-term partnerships. Our purpose is to offer our customers high quality products, reliable customer relationships, constant innovation and solutions that correspond to the needs of the customers.
