

WALL MOUNTED LPG/PROPANE VAPORIZER: "INDOMECH" SERIES

LPG / PROPANE / WALL MOUNTED VAPORIZER : " INDOMECH" SERIES

"INDOMECH" SERIES LPG/PROPANE VAPORIZER

❖ FEATURE :

- Compact** : The Wall Mounted "Indomech" series Vaporizer is most compact Vaporizer available in market.
- Easy to Install**: As Wall Mounted "Indomech" Series Vaporizer is very easy to install and Taking very less space for installation.
- Reliable** : The Wall Mounted "Indomech" Series Vaporizer have designed by Industry experts and most reliable product.
- Efficiency** : All ENGGMECH Vaporizer are most efficient vaporizer in it class and manufactured with best process.
- Smallest** : The Wall Mounted "Indomech" series Vaporizer is *World's Smallest Capacity Vaporizer* in the class and Type available in market.

❖ TECHNICAL DESCRIPTION:

LPG/Propane Vaporizer: *These are electrically heated Vaporizers with water as heat transfer media. The complete system is fully automatic and various interlocks and safeties are provided so that LPG vapor is produced to meet the demand and no liquid can flow downstream of the vaporizers.*

Vaporizers will have a SS Coil placed internally in the hot water bath. The LPG enters the coil and is vaporized. As described above, the Interlocks between the Various Instruments regulate the flow of liquid LPG to meet the demand.

Our Vaporizer is designed with Maximum heat retention time. As a result, water bath heating is carried out most efficiently and power consumption is minimized.

Our LPG/Propane Vaporizer are PESO Approved

❖ TECHNICAL SPECIFICATION:

- ❖ Type : Electrically Heated, Hot Water Bath Type Vaporizer
- ❖ Capacity Kg/hr : 50 Kg/hr

Approval : PESO Approved

❖ APPLICATION :

All Small & Medium Scale Industry, All Large Scale Industry with lower LPG Energy requirement , Resturants, Malls, Hospitals, Schools etc.
