ACCESSORIES FOR MAGNETIC CYLINDERS Series A52

REED SWITCH

Function

The reed switch and clamping kit assembly is mounted on the Air cylinder (Series A52), for proximity sensing. The piston of the cylinder is equipped with a permanent magnet which activates the reed switch on approaching it. The reed switch closes the circuit giving an electrical signal, which could be used further as required. The accuracy of the sensing distance depends on the speed of operation of the piston.
