

## **General instructions for use of Geaktiv for cannabis plant**

### **1. Possibility of use: GeAktiv Organic**

#### **1. Growth medium preparation:**

- **30% (Max.) Geaktiv + 70% medium of your choice (soil, coco, perlite etc.)**
- **It is possible to use only liquid GeAktiv concentrate solution without adding of GeAktiv fertilizer to the medium, with lower yields then if mixed into the growth medium from start of cutting.**

#### **2. Preparation of liquid concentrate:**

- **Mix 1 part of GeAktiv fertilizer with 3 parts of clean water and let it sit for min. 24 hours for Microbe and Mycorrhiza activation to make liquid concentrate *(after activation the mixed solution can sit and wait for usage at least 1 week)***

#### **3. Preparation of watering solution**

**-Mix activated GeAktiv fertilizer with clean water to make GeAktiv water mix and adjust the PH of solution to your usual PH value. Use activated GeAktiv fertilizer as supplement for your usual fertilizer and adds to water solution till you reach desired EC value (Max. 2.0 EC). Follow your usual EC values from cutting to flowering of the plants using GeAktiv as Organic fertilizer with immediate effects. Naturally the optimal EC values of watering solution are variety and environment dependent.**

## **General instructions for use of Geaktiv for cannabis plant**

### **2. Possibility of use: GeAktiv + Mineral complex**

#### **1. Growth medium preparation:**

- **30% (Max.) Geaktiv + 70% medium of your choice (soil, coco, perlite etc.)**
- **It is possible to use only liquid GeAktiv concentrate solution without adding of GeAktiv fertilizer to the medium, with lower yields then if mixed into the growth medium from start of cutting.**

#### **2. Preparation of liquid concentrate:**

- **Mix 1 part of GeAktiv fertilizer with 3 parts of clean water and let it sit for min 24h for Microbe and Mycorrhiza activation to make liquid concentrate (*after activation the mixed solution can sit and wait for usage at least 1 week*)**

Follow your usual EC values from cutting to flowering of the plants using GeAktiv as Organic fertilizer with immediate effects. Naturally the optimal EC values of watering solution are variety and environment dependent.**

## **B2B TESTIMONIAL**

### **CannaS Switzerland**

- **Immune system (better disease and pests resistance)**
- **Use less water**
- **Top Quality of essential oil**
- **Till 35% quantity of flowers**
- **Microbes are producing different humus acids and enzyme so the plant does not have to produce them, can use them immediately and concentrate on other processes**
- **Mycorrhizae produce till 300% bigger roots systems and help the plant absorb nutrients**
