

# DERMOLUCONIL TABLETS

## AYURVEDIC HERBAL MEDICINE

**A drug which is really a wonder medicine for the cure of LEUKODERMA (Vitiligo).**

**A** Drug, which is a wonder medicine for the cure of Leukoderma (Vitiligo).

Leukoderma is a disease in which skin is affected, the skin colour changes to white and white patches are seen on the skin. It can spread throughout the body. Even today Allopathic medicines are not able to cure Leukoderma successfully.

DERMOLUCONIL Tablets starts their action from within the body and the product aims at improving the general health and system of the body. The corrective action vis-à-vis the pigmentation on the skin starts from within, and the external appearance of pigments will start after one month to six months depending on the type of vitiligo, its spread and its history.

**LINE OF TREATMENT :** No visible effects will be seen for some time though the drug is acting from within. It takes time to see the results. Results can be observed only after continuous treatment of 2 to 6 months, after which the white patches will start turning reddish, and the natural skin colour pigments will start appearing by dots. These dots will go on increasing by numbers. The treatment should be continued till all the white spots completely disappear and natural skin colour is restored. It is advised to continue the treatment for further two months to ensure complete cure.

It may also be interesting to note that in some cases after taking medicine the spread of Vitiligo continued which is de-pigmentation process (Vitiligo) which has already started from within the body is becoming visible now. In such case the patients were advised not to worry about continuing of the spread of Vitiligo and continue the medicine without any worry as it is emphasised that the medicine is definitely not having any side effects and is not responsible for spreading vitiligo. In such a situation the patient should continue with medicine and allow the medicine to take its own course (from within) which will be anything from one month to six

months to become visible externally and ultimately, it shall experience that DERMOLUCONIL has worked satisfactorily over a period of time.

It is advisable to take HEMOPERFECTA tablets with DERMOLUCONIL tablets, as HEMOPERFECTA tablets enhances the action of DERMOLUCONIL by speeding up the process of skin pigmentation. HEMO-PERFECTA provides synergistic medium to expedite the action of DERMOLUCONIL. Further HEMOPERFECTA as a general tonic also improves the health and blood circulation thus helping the patients.

The wonder herbal drug "DERMOLUCONIL" consists of natural herbs having powers to cure Leukoderma.
