Cased Spring Mount

25 mm & 50 mm Standard Deflection

Catalogue Number : 9000100 : Rev. 01 Dated 07-10-2014

1. Compliance:

- Designed to BS 1726 -1 : 1987
- Tolerance to BS 1726-1 : 2002
- SAE and Ashrae Guidelines for Vibration Isolation

2. Application:

Cased Spring Mounts are used for isolating floor mounted sources of noise and vibration near critically quiet areas. These mounts are combination of Neoprene and Spring. Hence it can isolate audible / inaudible noise and vibration produced from floor mounted Mechanical Equipments such as Reciprocating Compressors, Close Coupled and Base Mounted Pumps, Packaged Air Handling Units, Condensing Units, Roof Top Air Handling Units, Air Cooled / Water Cooled Chillers, Centrifugal / Axial Fans, Internal Combustion Engines, Generators, Drop Hammers, Punch Presses upto static deflection requirement of upto 50 mm.

3. Product Features:

- Spring elements are designed to operate without Spring Buckling and shall have minimum of 50% overload capacity.
- Spring mount has external leveling arrangements to ensure equipment is in level condition after installation.
- Deflection can be provided for 25 mm and 50 mm at Rated Load.
- Inner walls of lower casing have resilient rubber Snubbers which
 - Provides a smooth guide for the top casing.
 - Prevents metal to metal contact
 - Limits lateral movement during startups, shutdown and due to horizontal wind load.
- Thick Ribbed Neoprene Pads are provided below the springs which provide noise barrier for high frequencies which may otherwise be transmitted to building structures.
- Springs are powder coated with individual colours to facilitate identification.
- Springs and Casings are powder coated upto 100 Microns with 1,000 Hours of Salt Spray Rating conforming to ASTM B-117.
- Option:
 - Frame Hot Dip Galvanised (Prefix Part Number with "HDG")
 - Spring Neoprene Coated (Prefix Part Number with "N")
 - Spring Plastic Coated (Prefix Part Number with "P")

4. Selection / Ordering:

- While calculating operating equipment weight, variables such as weight of water, weight of pipe fittings, valves etc should be taken into consideration to arrive at the actual loading on the spring.

5. Installation Guide lines:

- Detailed installation guidelines are included in the spring mount package.

SELECTION TABLE FOR 25 mm DEFLECTION CASED SPRING MOUNTS (Table No: C-02-01)

Isolator Model	Rated Load (kg)	Spring Colours	Dimensions (mm)							d
			L	W	H'	HIR'	A	BC	D	
SCSM-A50	50	Black	137	55	98	114	87	120	3/8"	12
SCSM-A100	100	Blue								
SCSM-A150	150	Grey								
SCSM-A200	200	Orange								
SCSM-B200	200	Black	165	67	112	132	107	145	1/2"	14
SCSM-B250	250	Yellow
