

Used mostly for high power load testing, our top class Resistive Load Banks are of great help in industries having generators, UPS appliances, battery systems and so forth. Available at the most affordable rates, these load banks are easy to operate and manufactured using the finest quality raw material and advanced technology. Checked using intense quality testing measures. These products are optimized to give the best performance to our customers.

Features:

- High Power Loading Application
- Load Banks above 500 KW available
- Custom Built available
- Testing of generator testing, Switchgear testing, load resistors, battery discharge resistors
