

Range of Products Manufactured by us

| Brand Name | Product Information | Usage / Target Pests & Diseases | Dosage |
|----------------------------------|--|--|--|
| ORGATHEA | Organic Manure (with high % of carbon) | Soil application and in planting pits. | 1-1.3 MT / Ha and 150 – 200 gm/pit |
| SPUTNIK-7 | Micronutrients Mixture | Foliar spray dissolving in water | 500gm/200ltrs water (per Acre spary) |
| PRAGATI | N-Triacontanol (Plant growth promoter) | Foliar spray dissolving in water | 100ml in 200ltrs water (per Acre spary) |
| MOHAR | Vermi Compost | Soil application and in planting pits | 1-1.3 MT / Ha and 200 – 400 gm/pit |
| PEAK SULPH | PEAK SULPH is an orange coloured liquid having 40% w/v sulphur in water soluble form. | Prevent black and red spider mites, white mildew, shot hole, brown rot, powdery mildew, rust mite, two spotted mite, tomato mites, fungicide & also works on Leaf Curl diseases PEAK SULPH : Acts also as nutrient for oil seeds cultivation. | Mix 1.5-2 ml in one liter of water & spray on leaf. Soil Application as nutrients |
| ASHIRWAD BIOZYME LIQUID | ASHIRWAD BIOZYME LIQUID is a mixture of protein peptides, polypeptides and amino acids from vegetative sources. It supplies nutrients to plants for faster growth. | Enhances protein in vegetative cells, increase chlorophyll for better photosynthesis. Acts as a cytoplasm osmotic agent & improves overall growth of plants. | Mix 1-2 ml in one liter of water & spray on leaf. |
| ASHIRWAD BIOZYME GRANULES | ASHIRWAD BIOZYME GRANULES is a mixture of 6% Humic Acid, 7% sea weed extract, 2% Amino Acid, 1% Fulvic Acid in a natural granules media for all type of cultivation. | Increases water holding capacity, seed germination reduces soil erosion, chelates nutrient uptake by plant, increases plant cell division & promotes growth, photosynthesis, root respiration & supply of nutrients | 8-10kg/acre (soil application), 25-40gms/plant/pot (for Pot Culture), 2kg/0.8 acre or 5 katha and for all type of cultivation. Mix with other fertilizers. |
| PEAK NEEM | AZADIRACTIN INDICA (300 ppm/1500ppm/ 10,000ppm) | Neem acts as repelent anti-feed ant and as Ovicidal effect on most of the pest. Right concentration of Azadirachtin in Peak Neem enables maximum benefit. | 1-8ml. per ltr. depending on ppm levels & pest infestation condition. |
| PEAK HUMIC (TEA SPECIAL) | POTASSIUM HUMATE (12% w/v) ZINC SULPHATE SOLUBOR MAGNESIUM SULPHATE MANGANESE SULPHATE | Improves Plant uptake of Essential Nutrients, increases effectiveness of applied fertilizers, improves water holding ability, promotes better soil structure, helps in all round development and growth of plants. | Mix 3-5 ml per ltr. of water. Generally upto 5ltrs. per season can be applied. Better result when used during Plucking season. |

We can customized Formulations depending on Buyers Requirement and Compatible Inputs.
