

### CHAIN LUBE SPRAY

**Description:** High-quality thermos table, extremely adherent, throw-proof lubricant compound. After the solvent has evaporated, the product leaves an extremely adherent, soft film of grease. Also suitable for O-ring chains.

**Applications:** Initial and maintenance lubrication of power-transmission chains. Especially suitable for dusty, dirty and corrosive environments. Due to extremely good adherence, especially suitable for high-load, fast-running chains.

Part No.: 1613      Contents: 400 ml.      Units in Carton: 12

### CHAIN CLEANING SPRAY

**Description:** Cleaning Spray is a special cleaning fluid which has been developed for removing stubborn dirt such as grease, oil and fuel residues or other serious contaminants from bodywork without damaging any other parts of two wheelers. Cleaning spray has outstanding wetting and penetration properties and if used according to the instructions does not attack glass, rubber, paint, chromium or aluminum. Cleaning spray is thoroughly biodegradable.

**Applications:** For pre-treatment of heavily contaminated vehicle engine compartment.

Part No.: 1614      Contents: 400 ml.      Units in Carton: 12

### SILENCER COATING

**Description:** Silencer coating is a heat resistant (up to 600°C) corrosion protective coating for metals, based on a special combination of pure Zinc and aluminium and modern resins. It builds up a very heat resistant film that has good adhesion and anti-corrosion properties. It builds up a very heat resistant film that has good adhesion and anti-corrosion properties and gives many things, such as exhaust pipes, grills and stoves a new look.

**Applications:** It can be used as a primer under a (heat resistant) topcoat or as a one can system (2 layer primer/topcoat) Directions before use: Free surface of rust and dirt; let it dry. Cover the parts which should not be painted.

Part No.: 1615      Contents: 400 ml.      Units in Carton: 12

### ANTI-RAT TREATMENT

**Description:** Anti Rat Treatment Spray is an easy to use, natural essential oil based product. When sprayed it prevents rodents from nesting, traveling and congregating in unwanted areas. Ideal for Cars, Trucks, Buses, Schools, Homes, Offices, Warehouses, Garages etc. This product does not kill rodents but just drives them away. Being essential oil based, this product is harmless to humans and has a pleasant minty smell.

**Applications:** It is ideal for protecting large & small vehicles from the threat of rodents damaging wiring, cables etc. This product can also be used for other applications where plastic pipes for gas water and other liquids are used for general utilities underground. It will also prevent rodent colonies underground in certain areas. This product also prevents rodents from biting wires, cables, and conduit.

Part No.: 1616      Contents: 250 ml.      Units in Carton: 24

### ENGINE GLOSS (PU COATING)

**Description:** High gloss water repellent protective paint for preserving the engine compartment. The engine looks new again, prevent corrosion and repels dirt. Protect the engine, ignition leads and system from damp. Compatible with rubber and plastic components.

**Applications:** For all engine compartments and engines in passenger vehicles, commercial vehicles, buses and two-wheeled vehicles.

Part No.: 1617      Contents: 250 ml.      Units in Carton: 24

### SILICON SPRAY

**Description:** Shines & Rejuvenates plastic and rubber surfaces. • Lubricate Plastic, rubber and metal parts. Keeps rubber soft and prevents cracking. • Prevents ageing and protects against extreme weather. • Preserves original appearance.

**Applications:** Due to its wide application, Silicon Spray can be used for rubber, plastics, leather, vinyl roofs and sealed wooden surface on vehicles as well as in the household and in the garden. For internal and external use.

Part No.: 1618      Contents: 400 ml.      Units in Carton: 12

### DRUM PAINT

**Description:** Drum Paint is a heat resistant (up to 600°C). Corrosion protective coating for metals, based on a special combination of pure Zinc and Aluminium and modern resins. It builds up a very heat resistant film that has good adhesion and anti-corrosion properties. The spray can be used on many metals, such as iron, steel, galvanized steel, white iron and cast iron, copper, brass etc. It is mainly used on exhaust pipes, grills, stoves and provides them with a new look.

**Applications:** Free surface of rust and dirt let it dry. Cover the parts which are not to be painted. Shake the aerosol well before, use during 2 to 3 minutes. Spray several thin layers from a distance of approximately 20-30 cm. After use, clear the nozzle by spraying up side down until only pure propellant emerges.

Part No.: 1619      Contents: 400 ml.      Units in Carton: 12

### CAVITY PANEL PROTECTION

**Description:** Solvent-based corrosion inhibitor for cavity protection. It is supplied as a thin, light thixotropic solution with good atomizing properties so that it can also reach relatively inaccessible areas such as narrow gaps between panels. Cavity protection infiltrates and displaces moisture. The product contains a high proportion of rust inhibitors. Cavity protection is very finely atomized during spraying, has outstanding creep properties, penetrates well into narrow gaps which need protection (such as welded seams) but does not run significantly out of seams. On drying completely, this product forms a plastic, water-repellent waxy film.

**Applications:** Cavity protection is mainly used in the workshop for spraying the inner surfaces of cavities such as the frame side members or the doors. The product can also be used to supplement the existing cavity protection of new vehicles, for re-treatment after 2-3 years and for cavity protection after accident repairs.

Part No.: 1620      Contents: 400 ml.      Units in Carton: 12

### LIQUID CAR CARE

A-8, Metro Bazaar, Behind Nangloi Metro Station, Nangloi, New Delhi 110041

## CLIMA FRESH (CABIN CARE)

**Description:** Within a short time (approx. 10 minutes) removes the unpleasant odors that are caused by bacteria and mold in air conditioning systems, ventilation ducts or vehicle interiors. Simple use without removal of the pollen or dust filter. A pleasant, fresh fragrance lingers behind. Works to prevent allergic reactions.

**Applications:** Before applying the product the surface of the evaporator should be dried by using the vehicle heating system. For this, the engine must be started. Afterwards the air conditioning system must be switched off. Set the temperature switch to max. (warm) and the heating and ventilation system to legroom position. Let the system operate for 10 minutes at max. fan power and in recirculation mode. Shake the can well before use.

Part No.: 1601  
Contents: 100 ml.  
Units in Carton: 24

## LITHIUM GREASE (Door Lubrication)

**Description:** Lithium grease is a synthetic high-quality, heat-resistant, extremely adherent and acceleration-resistant lubricant compound. After the solvent has evaporated, the product leaves an extremely adherent, soft film of grease

**Applications:** For the preventative regular lubrication of components in vehicles such as hinges, joints, linkages, reversing levers and door catch bands. Spray an appropriate amount of Lithium Grease onto the cleaned parts to be treated.

Part No.: 1602      Contents: 400 ml.      Units in Carton: 12

## V-BELT SPRAY

**Description:** V-Belt Spray is a special combination of agents formulated for maintaining and increasing the efficiency and performance of V-belt drives.

**Applications:** For all types of belts such as leather, rubber, balata and hair etc. Not suitable for the use on flat belt.

Part No.: 1603      Contents: 400 ml.      Units in Carton: 12

## BATTERY TERMINAL COAT

**Description:** Battery Terminal Coat is a special grease in spray form which is compatible with plastics and is formulated for the maintenance and care of motor vehicle electronic systems, particularly the battery terminals and electrical connectors.

**Applications:** Used especially for battery terminals, connections and plug connectors in vehicle electronic systems.

Part No.: 1604      Contents: 400 ml.      Units in Carton: 12

## ELECTRONIC SPRAY

**Description:** Electronic Spray is a fully synthetic contact spray which is compatible with plastics and formulated for use on vehicle electronic and electrical systems. Electronic Spray contains no silicones or mineral, animal or vegetable based oils.

**Applications:** Used for the care and maintenance (cleaning and protection) of all electrical components on the motor vehicle such as plug and terminal connections, lamp sockets, cable distribution boxes, switch elements, relays, ignition distributors, contact breakers, starters, dynamos/alternators, fuses, battery terminals and antennae and for the lubrication of fine mechanical components.

Part No.: 1605      Contents: 400 ml.      Units in Carton: 12

## WINDOW DRESSER

**Description:** Window Dresser is an excellent Polymer based lubricant for Rubber, Plastic, Metal parts and assemblies used in window frames of Automobiles, Sliding windows, Rubber Beadings, Rubber Rollers, Conveyors etc.

**Applications:** To spray on rubber channels & rubber beadings of car window frame and carryout smooth up and down movement of glasses of automobile windows till the movement becomes free from sticking.

Part No.: 1606      Contents: 400 ml.      Units in Carton: 12

## THROTTLE VALVE CLEANER

**Description:** Special active solvent for cleaning typical contamination and deposits found in the intake and throttle valve areas. Dissolves and removes all smeary deposits and contaminants such as oil, resins, adhesive residues etc. Also reliably cleans nozzles and internal components. Ensures the operability of all moving parts and reduces fuel consumption.

**Applications:** Removes contamination and deposits in the intake and throttle valve area. Only suitable for use in gasoline engines. Turn the engine off, thoroughly spray the parts to be cleaned and allow the agent to take effect for 2 to 3 minutes. Then restart the engine and generously spray the complete area again with the engine running at medium speed. Repeat cleaning in extreme cases.

Part No.: 1607      Contents: 400 ml.      Units in Carton: 12  
1621      100 ml.      24

## BRAKE LINING CLEANER

**Description:** Brake Lining Cleaner has been specially developed from synthetic and ceramic materials which eliminate brake squeals arising between the brake piston or contact surfaces and the brake lining.

**Applications:** Brake Lining Cleaner is suitable for the assembly, repair and maintenance of brake systems. Used for basic lubrication and as a preventive measure against brake squeals. However, it also universally suitable for numerous applications apart from brake systems.

Part No.: 1608      Contents: 400 ml.      Units in Carton: 12  
1623      100 ml.      24

## INSTANT RUST REMOVER

**Description:** Rapid Rust Remover contains a selection of agents with excellent rust-dissolving, water repellent, protective and penetrating properties.

**Applications:** The outstanding properties of Rapid Rust Remover lead to a wide range of applications in the factory or workshop, on motor vehicles and all equipment in the home as well as in hobbies.

Part No.: 1609      Contents: 400 ml.      Units in Carton: 12  
1622      100 ml.      24

## MULTI PURPOSE SPRAY ML40

**Description:** ML 40 Multi Purpose Spray is a combination of different agents with excellent corrosion protection, rust removing, water-displacement properties as well as an outstanding lubricating effect. In addition to this, ML 40 Multifunction Spray also improves electrical conductivity at contacts and removes dirt and stubborn oil and grease residues. Due to the combination of agents in the product, moving parts can be kept operational in all areas. The product gives off a pleasant aroma from the coconut fragrances contained in the formulation.

**Applications:** The outstanding, multifaceted properties of ML 40 Multipurpose Spray make it suitable for thousands of applications in the home, leisure time and in the workshop and industry. Spray the place to be treated with ML 40 Multifunction Spray and leave it to take effect.

Part No.: 1610      Contents: 400 ml.      Units in Carton: 12

## UPHOLSTERY FOAM CLEANER

**Description:** Upholstery Foam Cleaner is an active foam cleaner which has been specially developed for gently and quickly removing dirt from various types of upholstery, velours, carpets and vehicle coverings. Upholstery Cleaner Foam forms crystals as the foam dries out, freshens the colours on the parts which have been cleaned but does not leave any dirty edges after treatment.

**Applications:** Particularly gentle cleaning effect on upholstery, carpets, velours, vehicle covers and textiles etc.

Part No.: 1611      Contents: 550 ml.      Units in Carton: 12  
1624      650 ml.      12

## AC DUCT FOAM CLEANER

**Description:** A/C Duct Foam Cleaner is a highly effective cleaner with disinfectant properties. It cleans louvers of car air-conditioner, ducts, and coils. Its natural essential oil formula eliminates bacteria on contact.

**Applications:** Switch off the air conditioner spray into coil and ducts through louvers and vents so that the cleaning foam fills up the cavity. Allow the foam to work on the dirt for about 2-3 minutes then switch on the the blower which will help to break the foam and flush off the dirt.

Part No.: 1612      Contents: 550 ml.      Units in Carton: 12
